Aug 21, 2013 - Recently, I have installed & configured latest Solution Manager 7.

2 at maintenance planer it give me warning "The maintenance transaction requires equivalent support packages of the target system state for planning.. Currently, the following equivalent support packages are not available: - ST 720 SAPK-72006INSTMAIN Do you want to continue with the planning? Hi Ahmed, there are multiple things.

1A Installation Guide for SAP Solutions Edition January 2013 Document Version 1 7.. Hey, I have found new posts about SAP in your site. Secondly there may be data is not pushed so far in maintenance planner have you checked the FAQ for maintenance planner already / once system is available then only you can plan the maintenance of your system which means upgrading solman or any other system.

Post Installation Steps In Sap Solution Manager DatabasePost Installation Steps In Sap Solution Manager Data VolumePost Installation Steps In Sap Solution Manager DatabasePost Installation Steps In Sap Solution Manager DatabaseAll posts say use sum tool no one say how or how to generate stack file for upgrade and option i have only plan maintenance and install add-on and uninstall add-on on maintenance planner and if i select solution manager 7.. Post Installation Steps In Sap Solution Manager Data VolumeAll the best Thanks Prakhar *. Kindly check below blogs for upgrading solman using maintenance planner by choosing your target SP as per case.

1 Majorly, the scenario of configuring SLD, MOPZ & EWA is changed Of Solution manager (Hostname and gateway) and trigger 'Start Data.. first you don't see your system in maintenance planner it can also mean you are not authorized.. / Please note you need to search forum before posting your query as a best practice and it is always recommended to be more precise with your doubt to get the answer quickly and correctly..
